

BUILT BETTER FROM THE INSIDE OUT.

WE START WITH A 48" DESIGN

Size matters. Our standard booth is built for comfort... with a full four foot length.

UNI-FRAME "L" CONSTRUCTION

Our booth frames are cut in a single slice. Unlike our competition, DMS backs will NEVER wobble.

SCREWED & GLUED AT EVERY JOINT

We don't depend on pin nails. Every connection is corner blocked, glued and screwed into a permanent connection.

INTEGRATED CRUMB STRIP

Our crumb strip is a component within the construction of our booths. Easier cleaning for you, more comfort for your guest.

TALL ABS PLASTIC KICK PLATE

Every booth includes our 7 1/4" indestructible kick plate. It's tall enough to ensure that the booth fits tight against the wall.

LIFETIME WEB SEATING

Our web seat is both comfortable and made to last forever. It will never rust, squeak or sag. We warranty it for life.

DOUBLE-THICK 3" FOAM

Simply put, we double the foam on the seat, and double the comfort for your guests.
